About 1919 Investment Counsel

1919 Investment Counsel is the investment advisor to the 1919 Funds and manages approximately \$22.9 billion in assets as of June 30, 2024. The cornerstone of 1919's investment process is proprietary, fundamental research with an emphasis on quality, risk management and diversification.

In addition to the 1919 Funds, 1919 Investment Counsel provides customized equity and fixed income strategies for institutions, family offices and high net worth individuals.

Portfolio Managers, Ron Bates, Alison Bevilacqua, Aimee Eudy, and Robert Huesman share their latest insights on the management of the Socially Responsive Balanced Fund.

Q1. For the past 15 years, the 1919 Socially Responsive Balanced Fund has ranked in the top 10% for performance over multiple periods in the Morningstar Moderate Allocation category. What key factors have driven this performance consistency?

We are pleased to report the Fund has achieved top decile performance over the 1-, 5-, 10-, and 15-year periods as of June 30, 2024. The Fund's Morningstar percentile rank based on total returns over those periods was 5 out of 740 funds for 1 year, 6 out of 649 funds for 5 years, 6 out of 493 funds for 10 years, and 8 out of 361 funds for 15 years as of June 30, 2024, in the Moderate Allocation category.

Overall, historically this consistent performance can be attributed to a number of factors, including the following:

- ▶ **A Consistent Allocation Strategy:** Historically, the Fund has maintained a consistent allocation of approximately 70% equities and 30% fixed income, within a 5% range between 65% and 70% for equities. This focused balanced approach has delivered strong performance and helped to manage volatility over time.
- ▶ **A Long-Term & High-Quality Focus:** The portfolio management team has stayed focused on the rigorous selection of high-quality companies that can deliver long-term results. The Fund's consistent performance reflects the quality of our equity and fixed income research and our rigorous responsible investing approach. The Fund aims to deliver strong results while also considering the impact of its investments.

Q2. Are there any sectors or themes that provide opportunities from both a performance and socially responsive perspective?

Over the years, the Fund has identified sectors and themes with the potential for long-term sustainable growth. Currently, these include artificial intelligence (AI) in the Healthcare sector and other industries, where the portfolio management team sees high-potential opportunities for growth.

1919 Socially Responsive Balanced Fund

Commentary - June 30, 2024

For example, NVIDIA has been a strong long-term investment for the Fund's portfolio.* The company designs, manufactures, and sells semiconductor chips, graphics processors, and related software and is at the forefront of AI.

NVIDIA's sales and earnings growth has been exceptional, driven by its application of artificial intelligence (AI) in various sectors, such as Healthcare and Industrials. We continue to view NVIDIA as a leader in AI and expect the company to continue to deliver strong results over the long term.

As we move forward in 2024, we will monitor and evaluate sectors and themes that align with the Fund's investment objectives and provide positive impact opportunities.

Q3. How is the Fund's fixed income portfolio positioned to capture income opportunity in this higher-for-longer interest rate environment?

The portfolio is currently positioned with a shorter duration than its benchmark. For example, as of June 30, 2024, the Fund's duration was 4.49 years versus the Bloomberg Aggregate Bond Index's duration of 6.03 years. The team seeks to extend duration opportunistically, and the Fund is currently overweight corporate bonds, where we have found high-quality income opportunities.

Overall, the fixed income portfolio is approximately 35% allocated to Green, Social, and Sustainable ("GSS") bonds. The portfolio management team continues to evaluate opportunities that meet our rigorous financial and impact criteria. ■

Portfolio Management Team

Ronald T. Bates

Ron manages the Equity portion of the Fund, is the Director of the Responsible Investing Team, and is a Managing Director at 1919 Investment Counsel. He has over 40 years of industry experience.

Aimee M. Eudy

Aimee manages the Fixed Income portion of the Fund and is a Managing Director at 1919 Investment Counsel. She has over 35 years of industry experience.

Alison Bevilacqua

Alison is the Head of Responsible Investing Research and a Managing Director at 1919 Investment Counsel. As a Responsible Investing Analyst, she specializes in Corporate Responsibility research. She has over 28 years of industry experience.

Robert manages the Equity portion of the Fund and is a Managing Director at 1919 Investment Counsel focused on the management of the Socially Responsive Investment strategies. He has over 17 years of industry experience.

Disclosure

*NVIDIA represented 4.69% of the Fund's equity portfolio as of 6/30/24.

The Principles for Responsible Investment are a voluntary and aspirational set of investment principles that offer a menu of possible actions for incorporating ESG issues into investment practice. As the hub for the sustainable and impact investment market in the United States, US SIF attracts a broad array of members who are committed to achieving both positive societal and environmental impact and competitive returns. The Green Bond Principles (GBP) and Social Bond Principles (SPB) promote integrity in the Green Bond market through guidelines that recommend transparency, disclosure, and reporting. CDP is a not-for-profit charity that runs the global disclosure system for investors, companies, cities, states, and regions to manage their environmental impacts.

The Morningstar Rating™ for funds, or "star rating" on page 1, is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history without adjustment for sales load. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating

1919 Socially Responsive Balanced Fund

Commentary - June 30, 2024

formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Class I shares of the Fund were rated against 689, 649, and 493 Moderate Allocation funds over the 3-, 5-, and 10-year periods, respectively. With respect to these time periods, Class I shares of the Fund received Morningstar Ratings of 4, 5, and 5 stars as of 6/30/24. Ratings shown are for the highest and lowest rated share classes only, when available. Other share classes have different expense structures and performance characteristics. Classes have a common portfolio.

The Morningstar Sustainability Rating™ on page 1 is intended to measure how well the issuing companies of the securities within a fund's portfolio holdings are managing their financially material environmental, social and governance, or ESG, risks relative to the fund's Morningstar Global Category peers. The Morningstar Sustainability Rating calculation is a five -step process. First, each fund with at least 67% of assets covered by a company-level ESG Risk Score from Sustainalytics receives a Morningstar Portfolio Sustainability Score.

The Morningstar Portfolio Sustainability Score on page 1 is an asset-weighted average of company-level ESG Risk Scores. The Portfolio Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk. Second, the Historical Sustainability Score is an exponential weighted moving average of the Portfolio Sustainability Scores over the past 12 months. The process rescales the current Portfolio Sustainability Score to reflect the consistency of the scores. The Historical Sustainability Score ranges between 0 to 100, with a higher score indicating that a fund has, on average, more of its assets invested in companies with high ESG Risk, on a consistent historical basis. Third, the Morningstar Sustainability Rating is then assigned to all scored funds within Morningstar Global Categories in which at least thirty (30) funds receive a Historical Sustainability Score and is determined by each fund's Morningstar Sustainability Rating Score rank within the following distribution: High (highest 10%), Above Average (next 22.5%), Average (next 35%), Below Average (next 22.5%), and Low (lowest 10%). Fourth, then Morningstar applies a 1% rating buffer from the previous month to increase rating stability. This means a fund must move 1% beyond the rating breakpoint to change ratings. Fifth, they adjust downward positive Sustainability Ratings to funds with high ESG Risk scores. The logic is as follows: If Portfolio Sustainability score is above 40, then the fund receives a Low Sustainability Rating. If Portfolio Sustainability score is above 35 and preliminary rating is Average or better, then the fund is downgraded to Below Average. If the Portfolio Sustainability score is above 30 and preliminary rating is Above Average, then the fund is downgraded to Average. If the Portfolio Sustainability score is below 30, then no adjustment is made. The Morningstar Sustainability Rating is depicted by globe icons where High equals 5 globes and Low equals 1 globe. Since a Sustainability Rating is assigned to all funds that meet the above criteria, the rating it is not limited to funds with explicit sustainable or responsible investment mandates. Morningstar updates its Sustainability Ratings monthly. The Portfolio Sustainability Score is calculated when Morningstar receives a new portfolio. Then, the Historical Sustainability Score and the Sustainability Rating is calculated one month and six business days after the reported as-of date of the most recent portfolio. As part of the evaluation process, Morningstar uses Sustainalytics' ESG scores from the same month as the portfolio as-of date. Please click on <http://corporate1.morningstar.com/SustainableInvesting/> for more detailed information about the Morningstar Sustainability Rating methodology and calculation frequency. Sustainalytics is an independent ESG and corporate governance research, ratings, and analysis firm. Morningstar, Inc. holds a non-controlling ownership interest in Sustainalytics.

Important Information About The Carbon Risk Score On Page 1

Morningstar Portfolio Carbon Metrics are asset-weighted portfolio calculations based on Sustainalytics company carbon-risk research. The Low Carbon Designation™ badge is an indicator that the companies held in a portfolio are in general alignment with the transition to a low-carbon economy. In order to receive the Low Carbon Designation, a fund must have a Historical Carbon Risk Score below 10 and a Historical Fossil Fuel Percentage of Covered Portfolio Involved of less than 7%. Carbon metrics that produce peer-based percentile rankings will be subject to a minimum coverage requirement to be calculated. For metrics subject to this requirement, portfolios must have a minimum of 67% of the eligible portfolio covered to receive a calculation. All other carbon metrics will be calculated on the data available with no minimum criterion for coverage applied. All Morningstar portfolio carbon metrics are calculated monthly.

Mutual fund investing involves risk. Principal loss is possible. The Fund's social policy may cause it to make or avoid investments for social reasons when it is otherwise disadvantageous to do so. The Fund may invest in foreign and emerging market securities which will involve greater volatility and political, economic and currency risks and differences in accounting methods. The risks are particularly significant for funds that invest in emerging markets.

Fixed-income securities involve interest rate, credit, inflation and reinvestment risks; and possible loss of principal. As interest rates rise, the value of fixed income securities falls. The Fund may focus its investments in certain regions or industries, increasing its vulnerability to market volatility. The manager's investment style may become out of favor and/or the manager's selection process may prove incorrect; which may have a negative impact on the Fund's performance.

Duration is a measure of the sensitivity of the price, the value of principal, of a fixed-income investment to a change in interest rates and is expressed as a number of years.

The **Bloomberg U.S. Aggregate Bond Index** is an unmanaged, market-value weighted index comprised of taxable U.S. investment grade, fixed rate bond market securities, including government, government agency, corporate, asset-backed, and mortgage-backed securities between one and 10 years. One cannot invest in an index.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing.
